## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 18-23 are allowed over the prior art.

The following is an examiner's statement of reasons for allowance:

Regarding to claims 18, 21, Hughes et al (US 6,996,383) teaches digitized AGC system and method for controlling gain receiver; Singer et al (US 6,677,896) teaches remote tilt antenna system; Matsuda et al (US 6,552,608) teaches linear amplifier; Kezys (US 6,492,942) teaches content-based adaptive parasitic array antenna system; Romanofsky (US 6,292,143) teaches multimode broadband patch antenna. The teaching of the prior art either combined or alone fails to teach an adjustment unit performing perturbation control so that each period to temporarily change reactance of each of the plurality of variable reactance units is shorter than a period in which the perturbation control is not performed for any of the plurality of variable reactance unit.

Dependent claims 19, 20, 22, 23 are allowable for the same reason.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
